Assessment of FBSU Graduate Attributes

1. Preamble

Each university develops a set of graduate attributes to be achieved by its graduates across all programs. Graduate attributes are often associated with development of ‘sustainability’ capabilities. Doubtlessly, this sounds quite important. However, such sets of graduate attributes remain just ambitions if there is no evidence that they are being realized on the ground. This, in turns, requires periodic assessment to make sure that such graduate attributes are realized and sustainable. This plan has been developed to help assesst the FBSU graduate attributes.

2. Sources to identify FBSU Grduate Attributes:

1. Saudi Vision 2030
2. Labour market needs, including the neighboring promising NEOM area
3. Best national and international academic practices;
4. FBSU’s Mission and Vision Statements;
5. National Institutional Accreditation and Evaluation Center
6. Exit Exams of FBSU graduating students;
7. 21st century skills and competences;
8. Stakeholders’ feedback and suggestions;
9. FBSU students
10. Ministry of Education
11. Faculty members
12. University management
13. Alumni
14. Job employers

Program Graduate Attributes									

5. Assessment of FBSU Graduate Attributes

To measure graduate attributes, each university should define their own measurable descriptors called “indicators”. Descriptors of what students must do to be considered competent in the attribute; the measurable and pre-determined standards used to evaluate learning (i.e. measureable characteristics of attributes or components of attributes). In fact, what is assessed are the indicators rather than the graduate attributes.

5.1. Indicators Development

Graduate attributes describe what students are expected to know and be able to do by the time of graduation. Each graduate attribute is developed into a set of indicators, learning outcomes that define what learners should know and be able to do.

1. Each indicator represents the knowledge, skills, attitudes, or behavior that students should be able to demonstrate and indicate competence related to the attribute.
2. Indicators measure the achievement of the attribute.
3. Review the indicators annually and the curriculum map every three years.
4. In first year, assess the attributes related to soft skills.
5. Develop a standard course outline that includes the indicators related to the course.
6. Focus on most important indicators for each attribute dimension.
