

Dr. Abdulrahman Almunabhi is a distinguished leader with over 16 years of experience spanning engineering, project management, regulatory development, and strategic leadership across government and private sectors. Known for his ability to drive impactful change, he has led major initiatives in urban development, construction codes, and operational transformation. Currently serving as Senior General Building Codes Manager at NEOM Authority, and acting Codes and Standards Director, he oversees the development of Codes and Standards frameworks that shape one of the world's most ambitious projects.

Earlier in his career, Dr. Almunabhi held leadership positions in prominent development organizations, engineering consultancies and contracting firms, where he managed large-scale infrastructure projects, led cross-functional teams, and ensured delivery within budget and scope. He also served in academia as a Professor of Practice in the U.S., enriching his technical foundation and mentoring the next generation of engineers.

His unique combination of field expertise, policy insight, and strategic execution makes him a trusted advisor and forward-thinking leader.
